OVERVIEW

Our Classical Soft Shield is designed for confined space use in an airplane, train, metro and narrow corridors and is designed to give maximum protection up to NIJ 0108.01 level IIIA threats. This unique shield design also offers the capability to upgrade the protection by means of adding insert plates (one or two) placed centrally in secure pockets. This shield also incorporates additional supporting legs and can be folded in half in use or in storage if required. It can also be joined with another shield to form a supporting wall. The carrying system is of ambidextrous design and can be adjusted if required. A harness system also allows for an easy transport.

TECHNICAL DATA

STANDARD MODELS

(other models upon request)

Protective parts	Shield, trauma enforcement at main handle
Sizes	130x60
Colours	Black
Additional Modules	Bag, support legs, stand for legs

MEASURES

	60x130 cm	Insert plate 30x60
Protective areas ~m ²	0,78	0,18
Weight (NIJ 0108.01 IIIA) ~kg	7,5	2,8

MAIN MATERIALS

Ballistic material	Aramide
Surface	Flame retardant and high abrasion resistant Cordura®

TYPICAL PROTECTION LEVELS

(most commonly used)

	Type	Level	Main threat
NIJ 0108.01	BALLISTIC	IIIA	9x19mm & 44Mag
NIJ 0108.01 Insert plate	BALLISTIC	III	7,62x51 FMJ
