

# Data sheet Plate Carrier

## OVERVIEW

Plate carrier is designed to carry 250 x 300 mm insert plates. Size can be adjusted with adjustable shoulder straps and adjustable cummerbund. Vest is covered with PALS/MOLLE load bearing webbing. On the back and front there are zipper fixed MOLLE modules. User can prepare operation specific pouch setup on detachable MOLLE modules which are easy to change with just opening two heavy duty zippers. For better sweat management and air ventilation vest is equipped with Velcro® attached 3D mesh distance holders against the body. Vest has elastic loops for cable management. On the cummerbund there are pouches for 150x150mm insert plates and flexible pouches to hold for example magazines. On the backside of the carrier there is rescue handle.

### Ballistic Protection Levels:

- Plate carrier is only cloth part and without insert plates or soft ballistic panels offers no ballistic protection
- Can be equipped with 250 x 300mm soft ballistic panels Level NIJ 0101.04 IIIA
- Insert plates available in all common protection levels

### Colour options:

- Olive green
- Urban Camo
- Woodland Camo

**Accessories:**

- Zipper fixed Detachable Backpack-Module. This backpack-module can be fixed to the plate carrier with same heavy-duty zippers as the MOLLE-modules. Backpack has lead-in for hydration pack tube or other equipment cables. Outside and inside of the backpack is covered with PALS/MOLLE load bearing webbing. On the sides of the backpack there are compression webbing straps.
