

# Data sheet SEAGUARD

## OVERVIEW

The Seaguard buoyant vest provides a unique solution to officers assigned to routine waterborne operations. The front and back internal panels provide flotation. Unlike other buoyancy vests this special construction does not lose buoyancy if hit by bullets or fragments. The design incorporates a removable buoyant collar which increases buoyancy and ensures that the head always remains in the correct angle and face up. Reflective stripes are attached on both shoulders and a fitted signal lamp turns on automatically in water. All ballistic panels are water tight and sealed by welding

## TECHNICAL DATA

### Ballistic Protection Levels:

- Soft Armour: NIJ 0101.04 level IIIA
- Hard Plate Protection: NIJ 0101.04 level NIJIII, NIJIII+ or NIJIV

### Protective area:

- Depending on configuration

### Certifications:

- The Basic vest is certified to 50 Newton according to EN 393 and 393/A1:1998
- With the additional Foam Collar attached the vest is certified to 100 Newton according to EN 393 and 393/A1:1998

**Estimated Weight:**

- Depending on configuration

**Sizing:**

- M, L, XL and XXL

**Colour options:**

- Black Blue
- Urban
- Camo

**Cloth part materials:**

- Cover: Cordura, Lining: 3 Dimensional Knit Spacer
- Ballistic material is sealed inside a waterproof PU-coated nylon cover

**Accessories:**

- Carrying Bag
- Range of Pouches

**Other Info:**

Shoulder reflectors can be Hidden if required.

Automatic and Manually Functioning Light
